- Easy access to digital services.
- "Follow me" function to assist nurses and caregivers.
- Emergency function creates greater safety for users.

tēmi eNurse

Vital Sign
Measurement

eNurse collects patients' vital sign data remotely for record and analysis. The solutions also serve as online consultation platform, video education, meal delivery and tool for assessment. The Bluetooth vital signs devices supported by eNurse:

- ✓ Blood pressure monitor
- ✓ Blood glucose meter
- ✓ Forehead thermometer
- ✓ Finger pulse oximeter
- ✓ Body fat meter
- ✓ Stethoscope

Work Integration

INTEGRATION

eNurse can integrate with the NIS or HIS and send the patients' data to the institution directly.

EXTENSION MODULE

The eNurse extension module can display education video, help nurse to do the digital assessment or collect patients' consent signature.

MAGNETIC MODULE VEST

The magnetic module vest gives temi the ability to carry devices at the front while keeping the back tray empty for further use.
